Name: Mr. Narendra Nirmal Jana
Address: ip-240818 Apd1.10961238;;4429
Gender: Male
Ref. Physician: Dr P.N. Renjen

Patient ID: 00033626
Age : 34 y
Date : 15/Jan/2019

Background of MS since 2008 admitted for treatment with Rituximab.

Full field Pattern reversal VEPs were obtained from an Oz-Fz channel following independent stimulation of either eye.

Well replicable and symmetric responses were obtained both sides, with the major positive peak P100 latency mildly prolonged at 130 ms either eye.

IMPRESSION :::

Pattern VEPs reveal bilateral symmetric, mild demyelinating optic neuropathy.
