Hello Dr. Vogeler,

I shipped the USB drive, tracking below:

<https://www.royalmail.com/track-your-item#/tracking-results/RN582933098GB>

The USB drive is a little slow so simply copy the contents to your local drive and it should be fine. If you have problems with the drive inform me and I will send another drive. It's about 12 GBs of data but it's easy to reference.

Thanks,

Narendra Jana

Hello Dr. Vogeler,

I could send the digital copy of the documents by mail immediately (USB drive) and then we could catch up in person or by Skype later.

For an in person meeting, as of right now I have freedom to move between England and Germany but I may have an immigration restriction soon (probably within the next two weeks) that would restrict me to not leave the UK for a period of 6 months, which makes the person to person meeting difficult in the short term.

If we were to do an in person meeting, it would have to be soon.

The USB would include my entire pertinent medical record, the Charity Hospital data, the Bundeswehrkrankenhaus data and examples in other instances of fraud taking place (this isn't an isolated instance in my case, some of it is explicit evidence of fraud taking place; eg. a video of a radiologist erasing MRI series images to try and fraudulate MRI reports). The documents are all PDF searchable so it would take little time to reference them.

For this specific case (the 2 ER appointments and the LP lab results) its only about 20 pages of hospital reports that I extracted from Charity Hospital (and that's the entire medical record so you wouldn't have to extract anymore data from the hospital).

The other medical records to negate the Charity case are far more extensive.

I will send the USB tomorrow, to the address stated in your business card:

BrehmstraBe 1, 30173 Hannover. But lets see what your schedule is for the short term as well, I may be able to stop by next week before immigration restrictions.

Thanks,

Narendra Jana

Dear Mr. Jana,

thank you for your email. I was on vacation until 24.07.2019, so I can only answer you now.

Would you bring the documents in person or send them by mail? I think it would be better if I look at the documents in advance before we talk about the case.

Yours sincerely,

**Dr. Marcus Vogeler**

**Betreff:** For Dr. Vogeler - drop off medical data for Charity Berlin case

Hello Dr. Vogeler,

I dropped by a few months ago about a legal case against Charity Hospital in Berlin (falsifying lumbar puncture test results for a neurological condition [Multiple Sclerosis] and then using the results in an inpatient hospital setting to deny medical treatment where the long term effect was personal injury).

The negligence takes place in March of 2018.

You stated that I should drop by with my medical data so that you could review it.

What is your schedule for this week and next week so I could drop off the data so you could review it?

The case isn't difficult to deconstruct.

Thanks,

Narendra Jana
