

Hello San Diego Police,

I am filing two police reports in a single posting. They are both assault in an emergency setting in San Diego.

This posting is due to a recent assault with the same object as former instances of assault (that took place between April 11th and April 14th 2020) in a medical setting, thus it perpetuates the criminality of former instances of assault.

The first instance clinical assault took place on April 29th 2017 in Sharp hospital ER followed by the outpatient clinical assault of Dr. Paul Raffer on May 12th 2017 (he intentionally lies about the MRI report (the MRI of which has clear evidence of medical fraud) and fails to do the appropriate diagnostics tests for the clinical condition.

The second instance of assault in a medical setting took place on Aug 16th 2017. In the second instance its gross and clear evidence of intent to withhold medications with the object of physical harm to the patient. This instance of assault comes with clear evidence in another ER setting when the medications are given to a positive result.

The long term goal of repeated assault in medical settings is to cause physical or intellectual disfigurement by repeated harm in ER or outpatient settings. Withholding medications with the object of bodily injury or mutilation of the patient through neurological damage.

The link below gives detail of the entire situation that took place:

<https://narenjana.com/police/us/2017April29th>

<https://narenjana.com/police/us/2017Aug16th>

The link gives the course of events that took place in the ER setting to explicit detail and the course of events that took place outside of ER in Dr. Raffer's appointment. It includes the entire recorded happenings of the ER setting,

Though I don't expect a investigation in San Diego to take place (because this particular instance of assault is part a much larger case of criminal malice) in medical settings that took place in San Diego and the US, this report is done for the sake of filing a police report. A police report that presented to other avenues of law enforcement to demonstrate the intent of physical harm by the clinicians in San Diego.

The link given gives details of the entire situation in explicit detail with evidence of the object of the clinicians.

Thank,
Narendra Jana
