**The state of Massachusetts is the cause of the medical neglect and fraud since 2008 and sever medical mistreatment started in in 2008, December:**

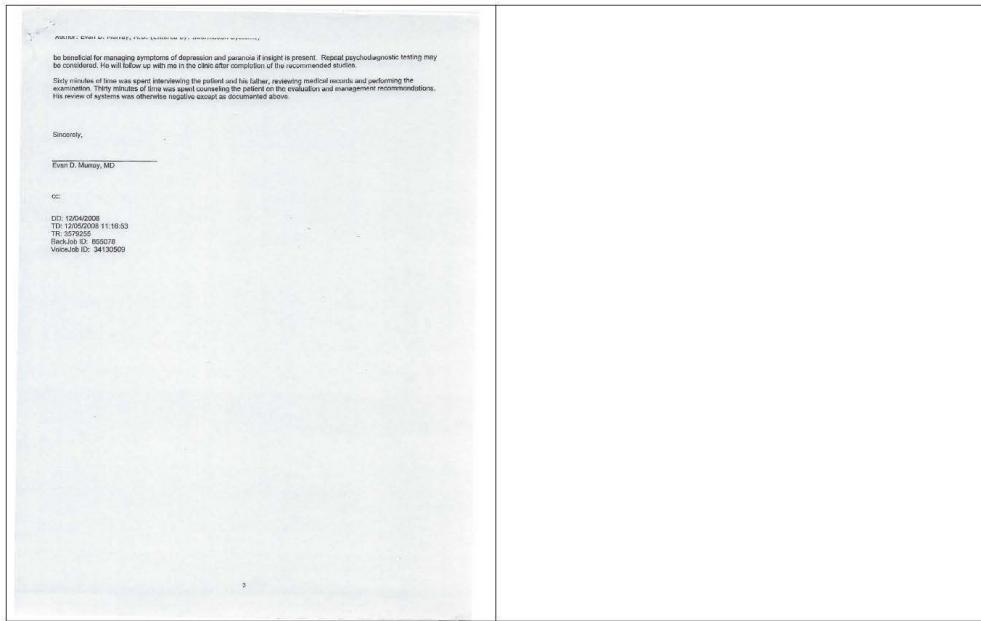

**Dr. Evan Murray is the start of the medical neglect in Neurology:**

**2008 December 4<sup>th</sup>**

- Dr. Evan Murray - Belmont, Massachusetts, USA
  - Criminal Negligence →

Dr. Evan Murray is the initiator of medical negligence and malice in medical settings and in the long term the undoubted cause of the neurodegenerative sequel through medical negligence that eventually becomes criminal (criminal fraud and criminal clinical negligence in an international setting). Its important to look at his past behavior in order to demonstrate his malice in medical settings in the future. In future settings he is far more enthusiastic about intentional physical harm through inappropriate recommendations that cause neurological damage is a clear way. His initial negligence is the underlying cause in 11 years of gross medical negligence thereafter.

## **Dr. Evan Murray is a Persecution and a Stalker so is Dr. Richard Falzone**

I should start by giving an idea of my general history and the primary suspects in those who started the malice.

I come from the relatively affluent towns of Sharon and Bolton, Massachusetts in the United States. Sharon till 2008 and Bolton from 2008 to when I left the US. That's where I grew up. My family is relatively well off. I went to Pennsylvania State University from 2002-2006, with a semester in Madrid, Spain and another in Leeds, UK. Undergraduate in Electrical Engineering. I'm extremely well educated. My career is in information technologies and computer engineering.

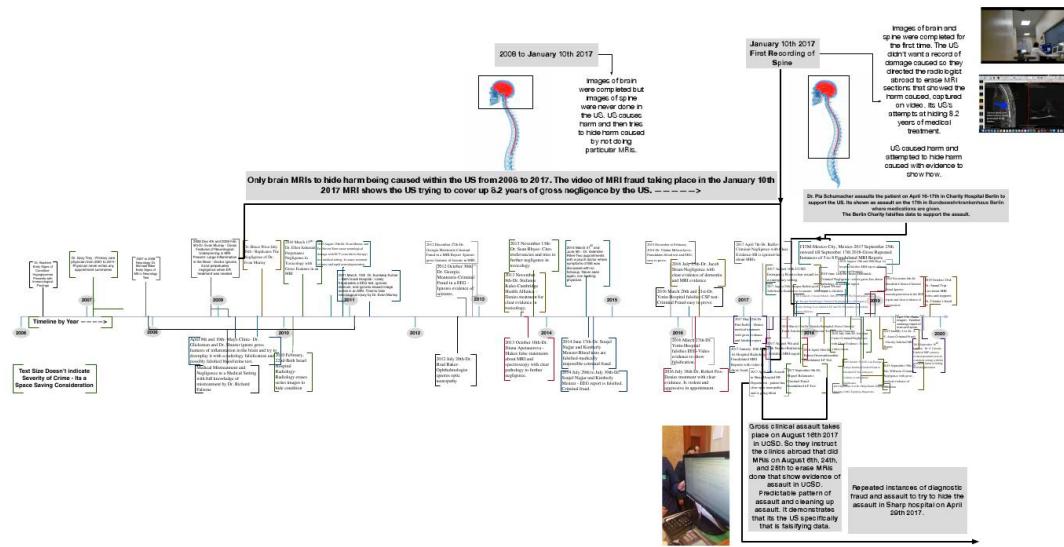

The asylum is mostly for persistent personal harm and injury by the US requiring immediate separation from the US; most of the other things cited fall under general malice.

There are clear examples of who led the malice in the US, namely Dr. Evan Murray (first doctor in the "medical doctors causing harm" section) in concert with the other sequentially doctors listed. Its known that even within the UK the malice in medical settings was most likely led by Dr. Evan Murray. He started the medical negligence, and perpetuated it country to country. Dr. Evan Murray is a military doctor and many of the illegal internet postings on Google (explained later) are thought have been lead by the US military. Thus he placed this public threat immediately outside of my workplace in the UK a few weeks ago (I get paid from a company in the US):

The medical fraud and medical mistreatment started in the state of Massachusetts in 2008, December and goes on for till now:

Why did adamant medical fraud take place is specific time periods in foreign nations as directed by the US?

Because it shows with easy evidence that the US grossly medically mistreated the patient in a large time span from December 2008 to January 2017.

Its to not admit to past instances of clinical harm in medical settings between 2008 and 2017 which was criminal in the US.

**Radiological fraud in a foreign nation (Riga, Latvia) is after almost a decade of negligence in the US shows that the US tried to erase sections of a MRI image to hide the harm they caused. This video of the radiologist erasing the data/modifying the recorded image is shown below:**

## Job Place Persecution and Fraud in California

The US military figured out that they couldn't mis portray me in a consumer company so they restricted employment to a US military contractor called Northrop Grumman (that's the only way

they could mis portray me, if they fully controlled the employer). Most of it is directed by the US military as creating fake situations to create a persecution of me for no reason.

1. US military both causes the neurological damage and creates the job mis portrayal, the job mis portrayal is by example shown above.

- They limited all other companies to employee me except US military controlled settings. I didn't know at that point, I didn't have an idea of why they did it.
