**The US force social Isolates me from people my own age and those of the opposite sex. US militarized forced virginity till my now age 39.**

They isolated me from people of my own age and the opposite sex. In this example they isolated me to people who are in their 70s for a concert advertised for people in their 20s and 30s. This is simply an example but the other examples are far more involved than this. It goes as far as digital informatics to restrict social interaction (cutting online chats).

They isolated me from the opposite sex for 39 years so they kept me a virgin. I am a heterosexual male. US said that the only way I would sleep with a woman is if I hired a prostitute (as their own statement) because close interpersonal relationships aren't allowed with me. Its below my standards, I only sleep with woman who I know and like and never any monetary exchange for interpersonal contact.

Sexual restriction (things against biological need) is a crime against humanity.
