### **Internet Bullying**

A form of internet targeting by the US.

In the past they would also use Tumbler, here is an old website of the US using tumbler to state that "You are dead to us", with a picture of a cake on my birthday (I have the full HTML site saved).

So  
thats a form of social malice in a internet media directed by the US when aggressively pursuing medical negligence with the intent of mutilation and intellectual disfigurement. This post was reitterated by 219,245 people in the US to demonstrate the level of social malice (persecution), its massive. Its an example with further evidence given here:

[\(February 15th\) Internet Bullying and Malice-Birthday](#)

They are extremely adamant in using social media to instigate me and have been adamant for long time with clear evidence. (I have an massive overabundance of evidence to substantiate this).
