Profile of Dr. Richard Falzone:

The profile of the doctor, Dr. Richard Falzone, that medically misdiagnosed psychiatry and medically mistreated multiple sclerosis to a gross extent is shown below.

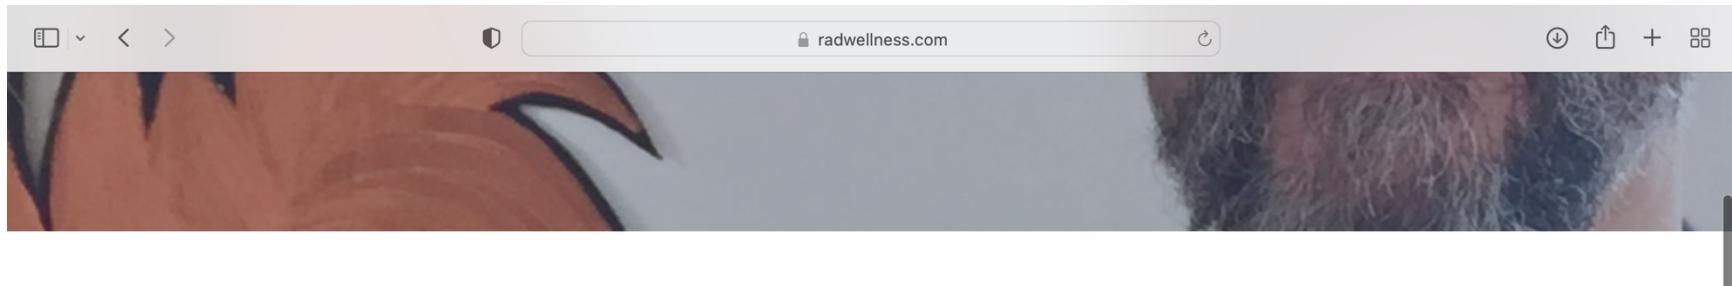

The role of the doctor is supposed to end at the end of the last visit by law but he perpetuated it by more than a decade. The United States aggressively adhered to a psychiatric misdiagnosis and forced doctors to falsify medical reports and diagnostics for the entire duration of 15 years of medical harm.

Even when having seizures extreme physical pain and suffering from the effects of multiple sclerosis, and in gross hospital emergencies they adhered to a psychiatric misdiagnosis from the entire duration. They are required to give emergency hospital treatment for multiple sclerosis and a manganese toxicity.

His direct involvement was from 2007 to 2010. There after it becomes the involvement of the state of Massachusetts I believe influenced by Dr. Richard Falzone as a collective crime.

They forced other doctors to act in a grossly unethical way, so its not the fault of the foreign doctors, it's the USs doctors/public effecting/forcing foreign doctors to act in a unethical way.

His medical neglect was done from December 2008 to 2023 by medical mistreatment/neglect of a sever form of multiple sclerosis due to a manganese toxicity. Their process of intellectual disfigurement to try a win their mis portrayal of me caused extreme physical pain and physical torture from the effects of multiple sclerosis for 15 years. Dr. Richard Falzone went well beyond medical mistreatment as the role of a doctor as well, its believed that he effected my personal and social existence by restriction. They used the effects from MS to effect me negatively referencing a non treating doctor, Dr. Richard Falzone.
