**Parents and Family are not Part of this Refugee Request (but they were harmed by the same persecutors, unaware they were)**

My parents and family are not involved in this immigration processing for refugee status in a foreign nation. You can not cite them and you can not reference them as needing to be in Switzerland for the sake of refugee status (its not a current issue). I could give you additional details about them but there is no point because they are not involved; they are not looking for refugee status; only I am. I am the one being persecuted.

In the US they cant help me because they see the harm taking place by medical doctors but if a medical doctor lies to them they cant do anything about it. They cant hire a lawyer on my behalf to stop the behavior of the medical doctor (dad tried in the past to do so). They don't have any legal help for me in the US.

I am US citizen who lived in Massachusetts; now my parents live in Texas. If you wanted an idea of my life there its below, it's a big house where I couldn't get up out of bed in extreme pain and occasional immobility for around 8 years from December 2008 to 2017 due to US militarized restriction of medical help and persecution. I was not aware that I was a US militarized target either.

Being well off doesn't exclude you from being an object of US government/US military persecution and harm. Being well off also doesn't mean that I wasn't a repeated victim of now 7 murder attempts (4 attempts on April 2<sup>nd</sup> 2023 due to US persecution even in Japan). Immigration cited the April 2<sup>nd</sup> 2023 event as refugee persecution (persecution due to being a refugee). Its something that immigration needs to know.

Our house in Massachusetts.

My car, which I used in both Massachusetts and California.  
Never any drivers accidents.
