

Why did adamant medical fraud take place in specific time periods in foreign nations as directed by the US?

Because it shows with easy evidence that the US grossly medically mistreated the patient in a large time span from December 2008 to January 2017.

Its to not admit to past instances of clinical harm in medical settings between 2008 and 2017 which was criminal in the US.

The video recording of the radiological fraud taking place in 2017 makes it easy to demonstrate intent in medical falsification.

The country knew the harm caused within the country. The US had multitudes of opportunities to do basic brain and spine MRIs but only brain MRIs were done in 7 MRIs, most with MRI series images erased as explained in document summaries.

So its easy to conclude that the reason why the US directed Latvia to falsify the MRI and radiological report in the January 2017 video recording of radiological fraud taking place (making it a easy case) is to try and hide the gross clinical negligence that had taken place over the past 8.2 years, from 2008 to 2017 in the US.

The other instances of medical falsification or trying to erase MRIs from radiology clinics as never happening (I still have the radiology report and MRI) demonstrates the repetitive intent of the US. Eg. Forcing the MRI clinics in Tijuana Mexico to erase the August 6th and August 24th, and August 25th MRI series images to hide the doctor's assault in UCSD San Diego on August 16th 2017.

This demonstrates that this entire case of fraud and repeated instances of assault is directed by the US.
