

A Two Day EEG was done in Bangkok Thailand, my physical condition was notable deteriorating at that point and could be seen in the pictures.

The pictures shows gross inflammation from head to toe, so the medical fraudulence was clear with a clear external effect from the negligence.

Though my skin healed within 6 months, this was entirely due to the intentional medical negligence that had taken place in the US.

This would not have happened if the US had not mistreated the condition.

There is inflammation from head to toe so doctor Dr. Vladan Milsavljevic definitely falsified blood tests.

Lumbar punctures occasionally cause bleeding, in this case it caused an orthostatic headache that lasted a week.

Lumbar punctures are hospital procedures.
