## About

I believe if there is a problem that bothers you, fix it...I do it by starting companies.

### Childhood:

- Had a room full of inventions, half of which my mom threw away (\$10 outdoor gather and water purification system, projectors, computers, sound systems etc.)

### Semi-Adulthood:

- As a mechanical engineer built cooling/ ventilation systems for skyscrapers.
- Worked for Senator Obama in Ohio, and surprisingly pulled off a victory.

- Harassed the White House until I was appointed to work for Obama in the Pentagon.

### Adulthood(ish):

- Wrote and executed a bunch of billion \$ Executive Orders for POTUS, first term.
- Resigned and founded a startup, because I missed getting my hands dirty.
- The startup was essentially Google glass for cars.
- Built high functioning hardware prototypes, but then realized that voice was the best part.
- Failed the company, but learned a ton
- Founded Apollo - Talking cars....yes it sounds and is awesome.
